Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 contains a composition formula with a variable "x". The variable is not defined. This renders the claim indefinite. Is this critical to applicant's invention?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawakubo et al (US 5,739,563). Kawakubo teaches a device comprising a substrate of MgO having formed thereon a coating of BST (111). The BST layer is formed by epitaxial growth. Regarding the method limitation of claim 2, the process by which the layer is formed is not considered to structurally define over the prior art.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Masuda et al (US 5,593,495). Masuda teaches a BST thin film formed on a substrate. The BST has a (111) orientation. Regarding the method limitation of claim 2, the process by which the layer is formed is not considered to structurally define over the prior art.

Art Unit: 1775

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Jia et al (US 6,312,819). Jia teaches a BSTO film deposited on a substrate. The BSTO film has a (111) orientation.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Basceri et al (US 6,319,764). Basceri teaches a BST layer with a (111) orientation on a substrate. Regarding the method limitation of claim 2, the process by which the layer is formed is not considered to structurally define over the prior art.
